0	Draft release	Create links to the K1 rooting tools	2024/07/18 18:47	jattie

Rooting your K1

Before it was allowed by Creality, there was this exploit to get your printer rooted.[1]

Now you can use Creality K1 Helper Script[2]. Start by reading the wiki, it's pretty straight forward. [3]

The shortcuts are:

- Enable root access[4]
- Connect to the printer using the SSH Tool [5]
- Change the date, time and timezone [6]
- Install the helper script. [7]
- Access the web interface [8]

Thant's it, you now have a rooted K1
